Scandinavian Modern Tree Trunk Table with Burl and Birch Top.

A Scandinavian modern side or occasional table made for a tree (probably beech) trunk. The table features large sections of burl on its column form and along the rim of the table's top. The top is hinged and when open the maker's initials and the date "1936" are visible. A very unique piece expertly crafted, lightly restored and in excellent condition.

Height: 23.5", Diameter: 28
